Yash Chauhan

Python Software Development Engineer II | Backend and Applied AI
+91-7597197668 | yashc9411407582@gmail.com | Kota, Rajasthan, India
linkedin.com/in/yashyc7 | github.com/yashyc7

PROFESSIONAL SUMMARY

Python backend engineer with 2+ years building Django and DRF platforms, multi-tenant SaaS and production LLM / RAG systems for US healthcare, insurtech and real-estate products. Cut cloud cost 70%, raised AI extraction accuracy from about 30% to 95%+, and was promoted to SDE-II within a year. Uses AI-assisted engineering (Claude Code, Cursor, GitHub Spec Kit) to ship clean, tested code.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C/C++
Backend: Django, Django REST Framework, Flask, GraphQL (Graphene), Celery, Redis, WebSockets (Channels), Microservices, REST APIs, Clean Architecture, SOLID
AI / LLM: RAG, LangChain, LangGraph, Pydantic AI, MCP (FastMCP), pgvector, ChromaDB, Docling, Embeddings and Rerankers, OpenAI API, DeepSeek, vLLM, Ollama, Hugging Face, n8n
Databases: PostgreSQL, MySQL, MongoDB, Redis
Cloud and DevOps: AWS (ECS, EC2, RDS, S3, VPC, CDK), GCP, Docker, Cloudflare DNS, CI/CD, Git, Linux, unit and integration testing
Frontend and Automation: React, JavaScript, Playwright
AI-Assisted Development: Claude Code, Cursor, GitHub Spec Kit, Obsidian knowledge base with automated scheduling for cross-project context
Currently Exploring: LLM evaluation, regression testing, fine-tuning of open-weight models

PROFESSIONAL EXPERIENCE

CodeArrest Softwares Private Limited **Jan 2025 – Present**
Software Development Engineer II (Sep 2025 – Present) | Associate Software Developer (Jan 2025 – Sep 2025)

- **Healthcare contract AI platform (Django, GraphQL, React, pgvector, AWS ECS):** Cut AWS cost 70% ($2,000 to $600 per month) in 2 weeks through right-sizing, removing idle resources and fewer LLM calls; rewrote heavy APIs so 1–2 minute screens load in under 500 ms.
- Raised extraction answer rate from about 30% to 95%+ with new prompts, pre-search and two-pass retrieval and grounded citations; built payer grouping, cited chat and clause analysis for 1,000–10,000 contracts. The client awarded a second AI project.
- **Medicare insurtech CRM (Django, DRF, PostgreSQL, Celery, Redis, AWS CDK):** Built a multi-tenant SaaS backend from scratch, owning Playwright data bots that collect plan data from public Medicare sources and up to 5 carrier portals on schedule, plus LLM extraction, classification, summaries and a chat assistant.
- **Healthcare CRM (Django, AWS, Stripe, Twilio):** Delivered 5 integrations (custom EHR, Stripe, email, calendar, call recording and transcription); closed HIPAA gaps with encryption, role-based access, audit logs and managed secrets; automated reminders with scheduled jobs.
- **Local AI agents (Python, MCP, vLLM):** Built a read-only MCP server for a property-management API that passed 42 of 42 automated checks and 25 of 25 concurrent calls (the open-source version failed 15 of 25); designing human-approved, draft-only agents on a private NVIDIA DGX Spark.
- **Fitness wearable backend (Django REST, Celery, PostgreSQL, Docker):** Built the API for iOS and Android apps with Apple HealthKit and Google health sync, OAuth and Sign in with Apple, Celery jobs and Firebase push; kept 85%+ test coverage.
- Optimised Django ORM queries and Redis caching across projects; led design and code reviews and mentored a junior engineer.

Mechlin Technologies **Jul 2024 – Jan 2025**
Associate Software Developer

- Built React frontend features for an in-house QA platform and integrated Django REST APIs; fixed critical system bugs.
- Improved overall system responsiveness by 10%+ using code splitting, lazy loading, memoisation and fewer, cached API calls.

PROJECTS

- **Deep Packet Inspection | Python:** Identifies protocols and applications by inspecting packets. github.com/yashyc7/deep_packet_inspection
- **Flash Vector DB | Python:** Vector database built from scratch with similarity search. github.com/yashyc7/flash_vector_db
- **Offline UPI Payments | Python:** UPI-style payments that work without internet. github.com/yashyc7/upi_offline_project
- **AI Voice Calling Agent | Django, LangGraph, Twilio:** Outbound lead-engagement calling agent. github.com/yashyc7/django_ai_voice_calling_agent
- **AI PDF Chatbot (Knowledge Assistant) | LangChain, ChromaDB:** RAG Q&A over uploaded PDFs. github.com/yashyc7/ai_pdf_chatbot
- **YouTube Summarisation Tool | LangChain, ChromaDB:** Transcript chunking and semantic summaries. github.com/yashyc7/youtube_summarization_tool

CERTIFICATIONS

- Cloud Computing and DevOps (AWS and DevOps tools), Hypertech Global Technologies, completing Dec 2026; includes an AWS 3-tier architecture project (VPC, public and private subnets, RDS).

EDUCATION

Modi Institute of Technology, Kota – B.Tech in Computer Science, CGPA: 8.94/10 May 2021 – Jul 2025
